

Patch Cable RJ45 DualBoot® Cat. 6_A ISO/IEC, Shielded

Connection cable RJ45/RJ45, shielded 1:1 pinout and featuring DualBoot® overmoulding incl. unlock protection. This patch cable is suitable for installations in offices, data centers and industrial facilities. Plugs are optimized for applications in high density switches. Use of DualBoot® overmoulding ensures optimal strain relief and eliminates catching of locking levers. Service mapping via the application of color coding may also be carried out at a later point in time (special accessory). The patch cable provides maximum data reliability via its braided shield with pair shielding, as well as its 360° shielded RJ45 plugs.
