

Side Module Rack 19" 0U, 14HP

Rack for use of preLink® data center plug-in modules. Up to 84 ports can be divided between 14 individual modules. The plug-in modules can be completely pulled out. Attachment takes place on the cabinet side. As a result, mounting is quick and easy. The mini-module support is combined with fiber optic data center modules. Lateral cabinet mounting makes it possible to implement space-saving, highly climate-friendly wiring without disturbing the flow of air.

Properties:

Material	Steel plate Nickel-plated and Heat-treated
Color	Gray, RAL 7035 Cover: Metallic Luster
Installation depth Keystone modul	120 mm For max. 84 Ports divided between 12 or 14 individual modules
