

F-Coupling and Blind Cover Module Replacement Empty Module Replacement for SC-S or LC-D

F-Coupling and Blind Cover Module Replacement

The preLink® F-coupling is used to integrate coax cables into a preLink® patch panel and the socket product range.

preLink® blind covers are used in distribution panels as well as in outlets to cover ports which are not in use.

Properties:

Material	Polymer
Color	white, similar to RAL 9010
Note:	Dust protector must be removed prior to installation of F-coupling.
Packaging unit	1 piece

Empty Module Replacement for SC-S or LC-D

preLink® empty module for SC-S or SC-D couplings in distribution panels or outlets. One blind cover must be installed between each module.

Properties:

Material	Polymer
Color	white, similar to RAL 9010
Notice:	Dust protector must be removed prior to installation of outlets.
Packaging unit	1 piece
