

# PushPull IP20 Patch cable

## RJ45 DualBoot<sup>®</sup>, Cat. 6<sub>A</sub> ISO/IEC, shielded

PushPull connection cable RJ45/RJ45, shielded 1:1 pinout and featuring DualBoot<sup>®</sup> overmoulding incl. PushPull unlock protection. In this RJ45 plug variant, the small RJ45 tab is not pressed to release, instead all you have to do is pull on the gland. PushPull locking works with any standard RJ45 socket and jack. The PushPull patch cable facilitates e.g. patching in densely packed data center patch panels, in difficult-to-access consolidation points or for subscriber ports in floor boxes. The plugs are optimized for applications in high density switches. Use of DualBoot<sup>®</sup> overmoulding ensures optimal strain relief and eliminates catching of locking levers. The patch cable provides maximum data reliability via its foil shield and 360° shielded RJ45 plugs.
